Through industry leading innovation
LG's Laundry appliances continue to
top the Consumer Reports charts
year after year!

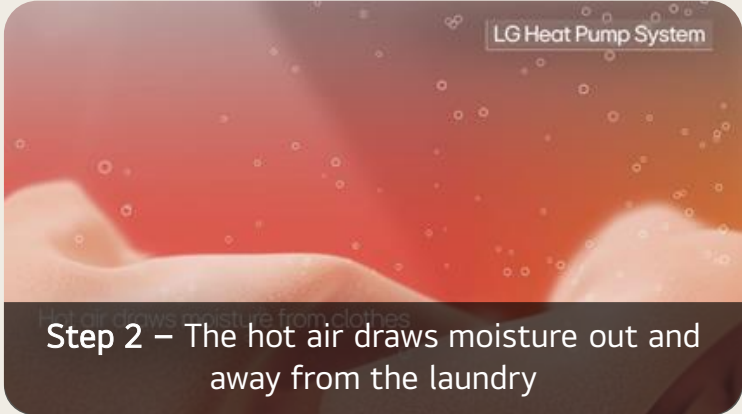

Heat Pump Revolution

Efficiency, convenience & performance

Heat Pump Drying

- ✓ **60% more efficient** than traditional vented dryers
- ✓ **Extremely gentle on fabrics** by drying laundry at lower temperatures
- ✓ **Easier to install** with no venting

LG WashCombo™ All-in-One

Get it Done in One

The all-new Wash Combo is packed with all of LG's best technologies. With its "Done in One" concept, it will fundamentally change the way Canadians do laundry

2 Hour Wash & Dry

Load, set and go. In under 2 hours, your clothes will be clean, fresh and dry. With the all-in-one design you can get laundry done while you get on with your day, without having to stop what you're doing to move clothes between 2 machines.

By pairing LG's TurboWash™ 360° advanced cleaning with our Inverter Heat Pump drying technology, we can provide a full wash & dry cycle for loads up to 10lbs.

Industry Leading Convenience

Auto-cleaning Condenser

Unlike some competitor's models that require the condenser to be cleaned manually, the LG WashCombo™ uses recycled water from the cycle to automatically clean its condenser. This always ensures hassle free peak level performance.

ezLintFilter

Say goodbye to excessive lint build up inside your washer/dryer combo with LG's new ezLintFilter that keeps the lint from recirculating inside the drum. The best part is that its arguably the easiest lint filter in the industry to empty out.

Inverter DirectDrive™ Motor

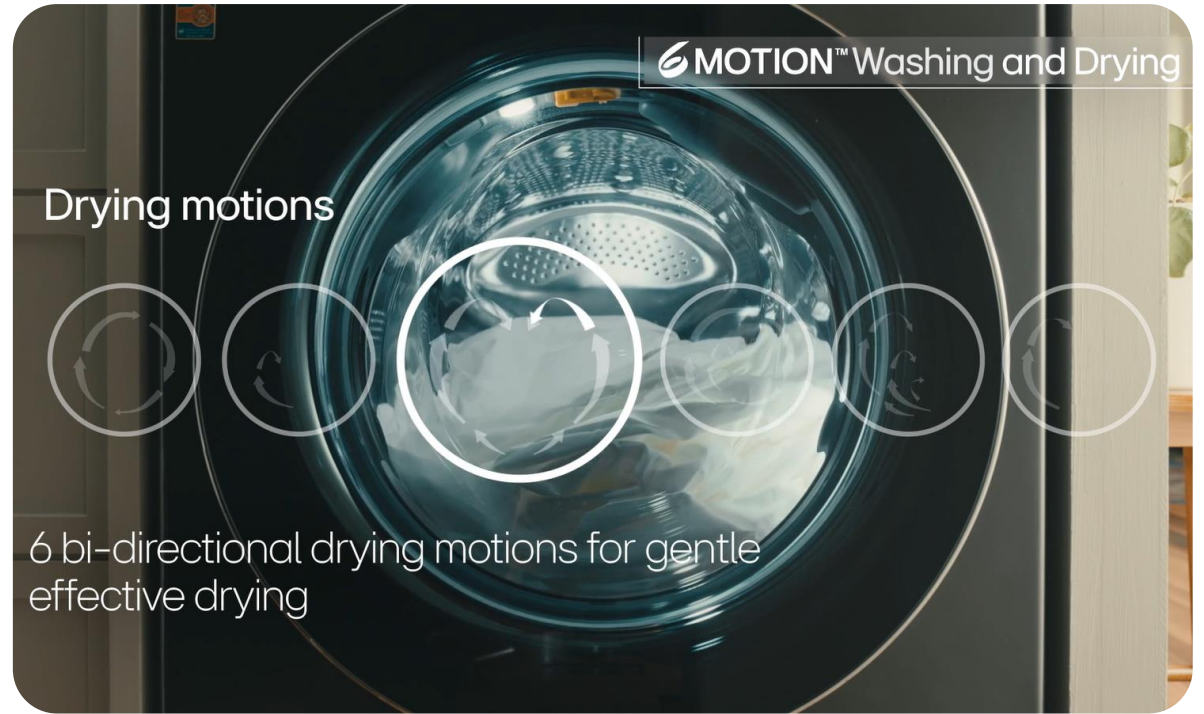

The world's first Direct Drive system in dryers

Thanks to LG's Inverter DirectDrive™ motor, we can produce **6 unique motions** with various drying behaviors.

LG's 6 motions operate at **variable speeds** ranging from 30rpm's to 75rpm's, unlike conventional belt driven dryer models that only tumble using one single speed (50rpm's).

This allows these models to offer better protection to your clothes, resulting in **36% less shrinkage** to delicates

Dryer motions: Tumbling Fluttering Tossing Rolling Spreading Holding

LG WashCombo™

Ultimate Flexibility

With its ventless design, 120V plug and matching accessories, the possibility of creating the perfect laundry space has never been more accessible.

Inverter Heat Pump Technology

This system recycles heated air for gentle drying using far less energy

Heat pump system drying steps:

1. Heat pump circulates hot air through the drum while using less energy.
2. The hot air draws out the moisture from your laundry.
3. The moist air leaves the drum passing through the heat exchanger where the water is extracted.
4. The heated dry air is then recirculated.

Extremely Energy Efficient

Without the use of a heating element, this method of drying saves **60%** more energy than conventional vented dryers.

Exceptionally Gentle on Fabric

By only heating up to 55°C, the heat pump system provides better care for your valuable garments. (traditional vented dryer typically reach 70°C)

Easy Installation & Wider Market Applications

With **no venting** required, these dryers are much easier to install and require no annual vent maintenance. These models have big savings benefits from a developer's perspective. By not venting, the HVAC system cost savings can be immense.

All-in-One Combi Washer/Dryer

Key Features

2-Hour Wash & Dry Cycle

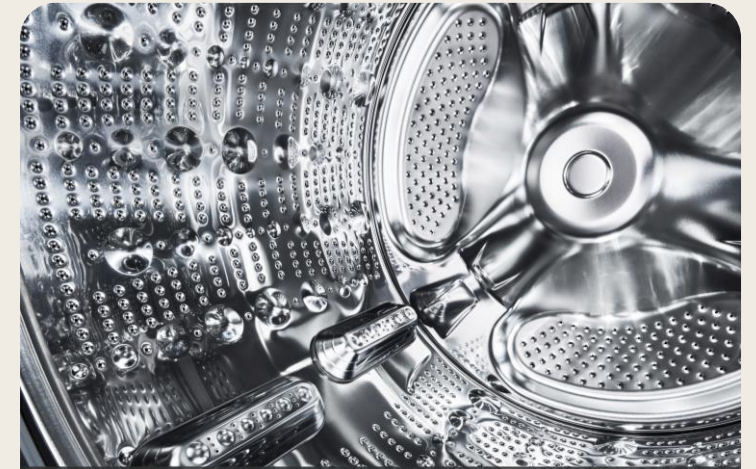

Between TurboWash's speed cleaning and the Inverter HeatPump™ quickly drying fabrics, this model can wash & dry a 10lb load in only 2 hours.

Energy Efficient Performance

Our heat pump technology offers amazing energy efficiency, gentle fabric care and an easy to install ventless system. All these benefits add up to offer your customers huge value.

Huge Capacity

With a mega capacity 5.7 cubic foot drum, LG's new WashCombo™ is one of the industry's largest capacity all-in-ones.

Dual Inverter HeatPump™ Dryers

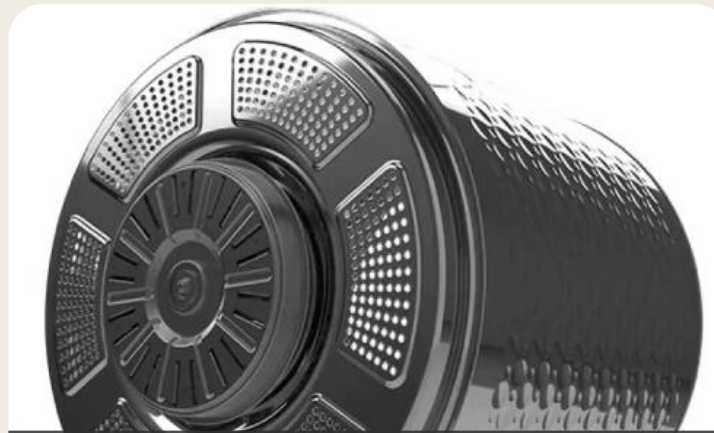

Key Features

Dual Inverter HeatPump™

Our Dual Inverter HeatPump™ technology offers amazing energy efficiency, gentle fabric care and an easy to install ventless design. These benefits all add up to offering customers huge value.

Inverter DirectDrive™ motor

In 1999 LG made the worlds first DirectDrive™ front load washer, now we launch the first & only Inverter DirectDrive™ dryer. By eliminating the belt & pulley, performance and reliability increase.

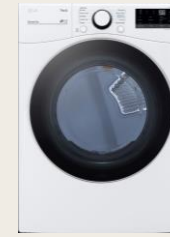

6Motion™ Technology

Administered through AI sensing, the six natural drying movements of tumbling, fluttering, tossing, rolling, spreading, and holding can reduce shrinkage to delicates by up to 36%.

TX Laundry

The next evolution in top loads

TX Laundry – 2024's iF Design Award

The iF DESIGN AWARD emphasizes design's global impact. With 10,800 entries from 72 countries, the iF DESIGN AWARD is one of the most prestigious and relevant design competitions in the world.

At LG, we have been delving deeply into design and research that takes full advantage of our technologically advanced era. That's why the work of the design team is geared toward our company's vision of becoming a Digital Life Creator. From a practical perspective, technology is becoming an increasingly important part of our modern lives. A growing number of products come equipped with microchips and networking options.

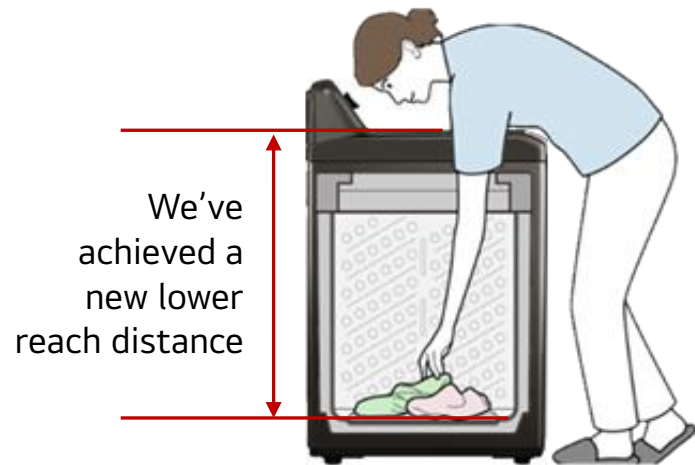

Easy Unload™ | EasyLoad™

Expanding our EasyLoad™ concept. Not only will these feature our existing exclusive EasyLoad™ dual opening dryer doors, but the washer will now be easier than ever to unload with the drum's new convenient height design.

Easy Unload™

By slimming the design of our top cover and raising drums base height we've shortened the reach distance by **2.72 inches**.

EasyLoad™

The exclusive dual-opening options of the LG EasyLoad™ door make loading and unloading the dryer easier than ever. (all TX dryers will have this feature)

ezDispense™

Top load auto dispensing

Smart dispense

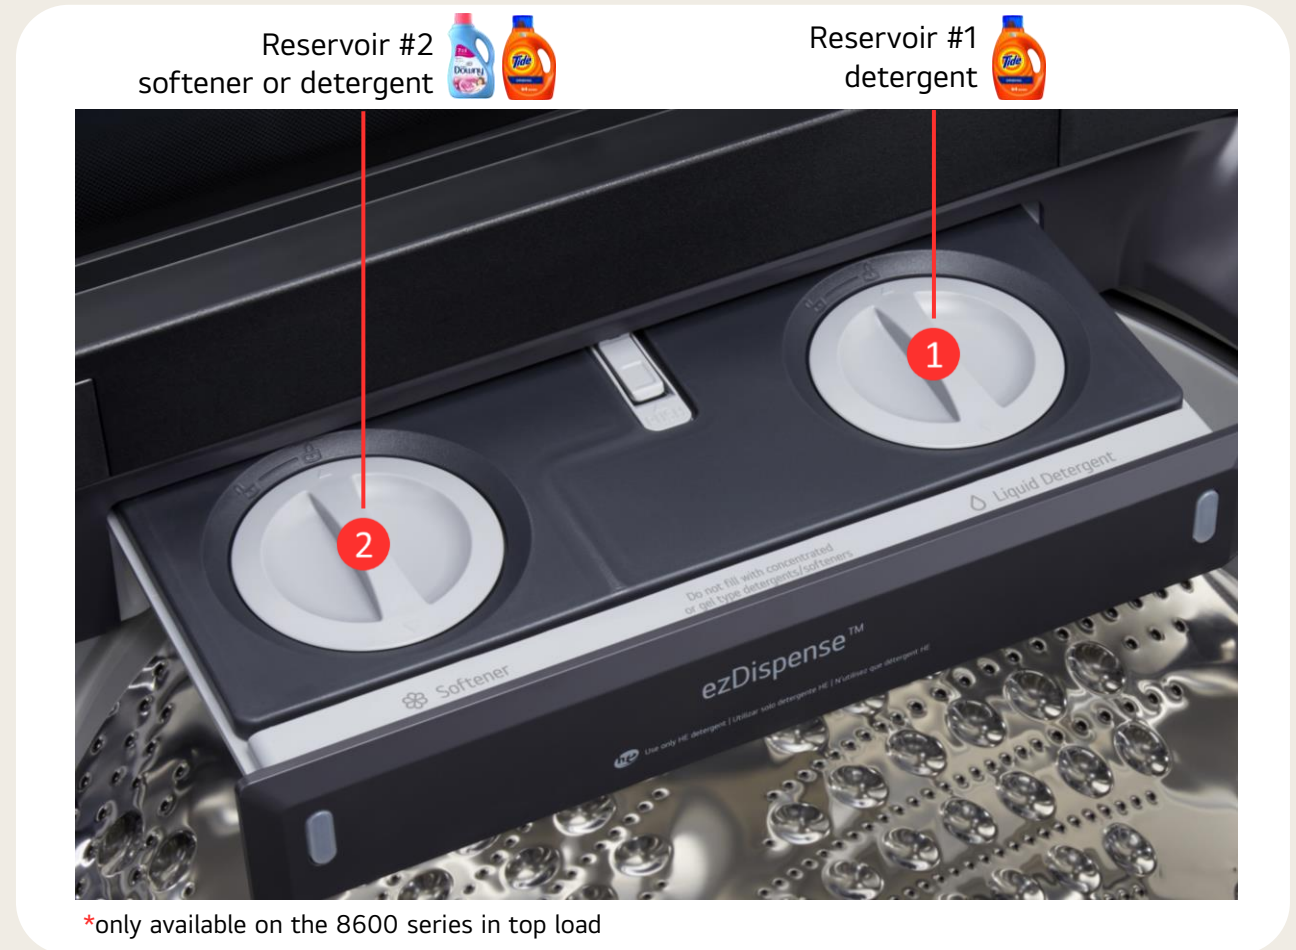

- Senses load size and determines the right amount of detergent/softener, ensuring wash performance and reducing the risk of residue caused by overuse.

Convenience

- The reservoir holds enough detergent/softener for up to **14 loads**.

Expandable detergent capability

- Customers who don't use softener can use reservoir #2 to add more detergent, allowing them to clean up to **25 loads** before having to refill their detergent.

Digital Dial with LCD Display

Information at every turn

LG's 8600 TX series comes with all-new digital dial controls. The major benefit is that it provides your customer with more information than ever. This will enhance the user experience, greatly increasing satisfaction.

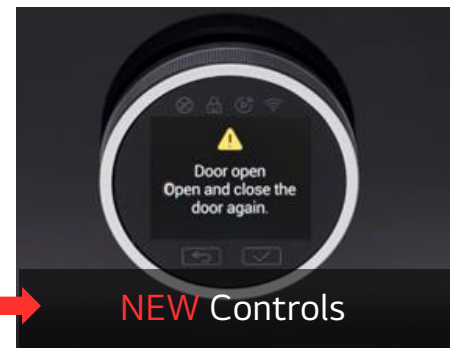

Cycle Descriptions

Cycle Status

Error Solution Suggestions

Faucet Feature

Spot cleaning made easy

- Press the Faucet button to turn the cold water on in the tub, so you can spot clean items before putting them in the tub to wash.
- To stop the water, close the lid or press the faucet button again.
- After the Faucet option is turned off, the water is automatically drained.
(After using the Faucet function, press the Power button if you want to use the water in the tub)

Key Features

AI Wash

Built-in AI technology detects fabric texture and load size, then automatically selects the right wash motions, temperatures and more.

ezDispense™

LG ezDispense® auto dispenses the right amount of detergent & softener up to a 1 month supply. The softener compartment can also be used for soap to extend the length in between fills.

Water Faucet

Spot-clean stains as you see them with the convenient water faucet option. Just turn on the faucet in the tub while you scrub.

Washer

Dryer

Informative Digital Dial

This dial will give the user all the information required to select cycles, modify options, and even diagnose any issues that may arise.

AI Sensor Dry

Built-in sensors & AI detect fabrics, load size, and moisture to automatically adjust drying time – improving fabric care and energy savings.

EasyLoad™ Door

The worlds first dryer door designed with the ability to open two ways. Downwards for easy loading, and out-swinging for an easy unload.

LG Induction Cooktops & Ranges, First in Industry Certified to New Energy Star Specs

As ENERGY STAR Partner of the Year, we are proud to usher in the new ENERGY STAR cooking category, which will help consumers further reduce their carbon footprint. ENERGY STAR certified induction cooking products are key elements of our broader electrification strategy, which empowers customers to convert buildings to conserve energy, saving money and protecting the environment in the process.

Key Features

UltraHeat™ Elements

Wielding either a 5000 or 4300 Watts of power, LG induction cooktops offer powerful cooking performance that can efficiently bring a pot to boil very quickly.

Energy Star® Certification

Cooking products represent the next frontier for residential energy efficiency and LG is the first manufacturer in the industry to receive certification of new energy star specification requirements.

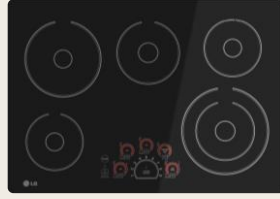

Cookware compatibility indicator

This function rates the cookware and elements compatibility on a scale of 0 to 10 to help you optimize performance and efficiency.

Dishwashers

LG dishwashers have been recognized by Yale Appliances as being the most reliable dishwasher brand over the last 3 years. Attributed to this success is the fact that LG manufactures more of its dishwasher components, like motors and other key parts than most other manufacturers.

The Most Reliable Dishwasher Brands for 2024

The following service rates are based on a minimum of 100 products sold and a total sample of over 7,000 products within 12 months.

	Service Rates
→ LG	4%
Bosch	5.9%
Thermador	5.9%
Miele	6.2%

LG LDFC2423V

- Stainless Steel Tub for a Durable Surface that Resists Rust
- Dynamic Dry™ Technology for More Efficient Drying
- Auto Leak Detection for Worry-Free Operation

See What Consumer Reports Has to Say 

* Consumer Reports does not endorse products or services. See the most current ratings from Consumer Reports.

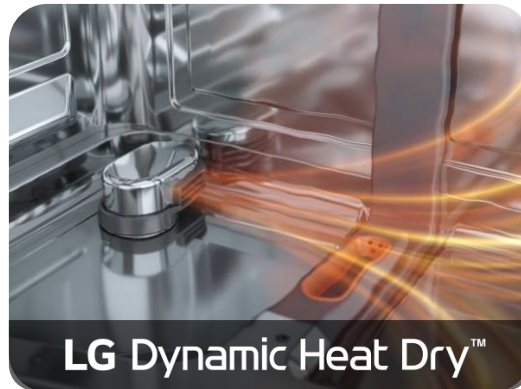

1-Hour wash & dry cycle

LG's exclusive QuadWash Pro™ and Dynamic Heat Dry™ technologies combine to deliver the industry's leading 1-hour wash and dry cycle* for sparkling, table-ready dishes in less time.

High-pressure jets with 38% more cleaning power, spray dishes from multiple angles, while soaking them with over one million microbubbles to help break down stubborn food residue and provide exceptional cleaning performance

Our Dynamic Heat Dry™ technology circulates hot air throughout the dishwasher for faster, more complete drying, delivering sparkling, table-ready dishes right off the rack including hard-to-dry plastics.

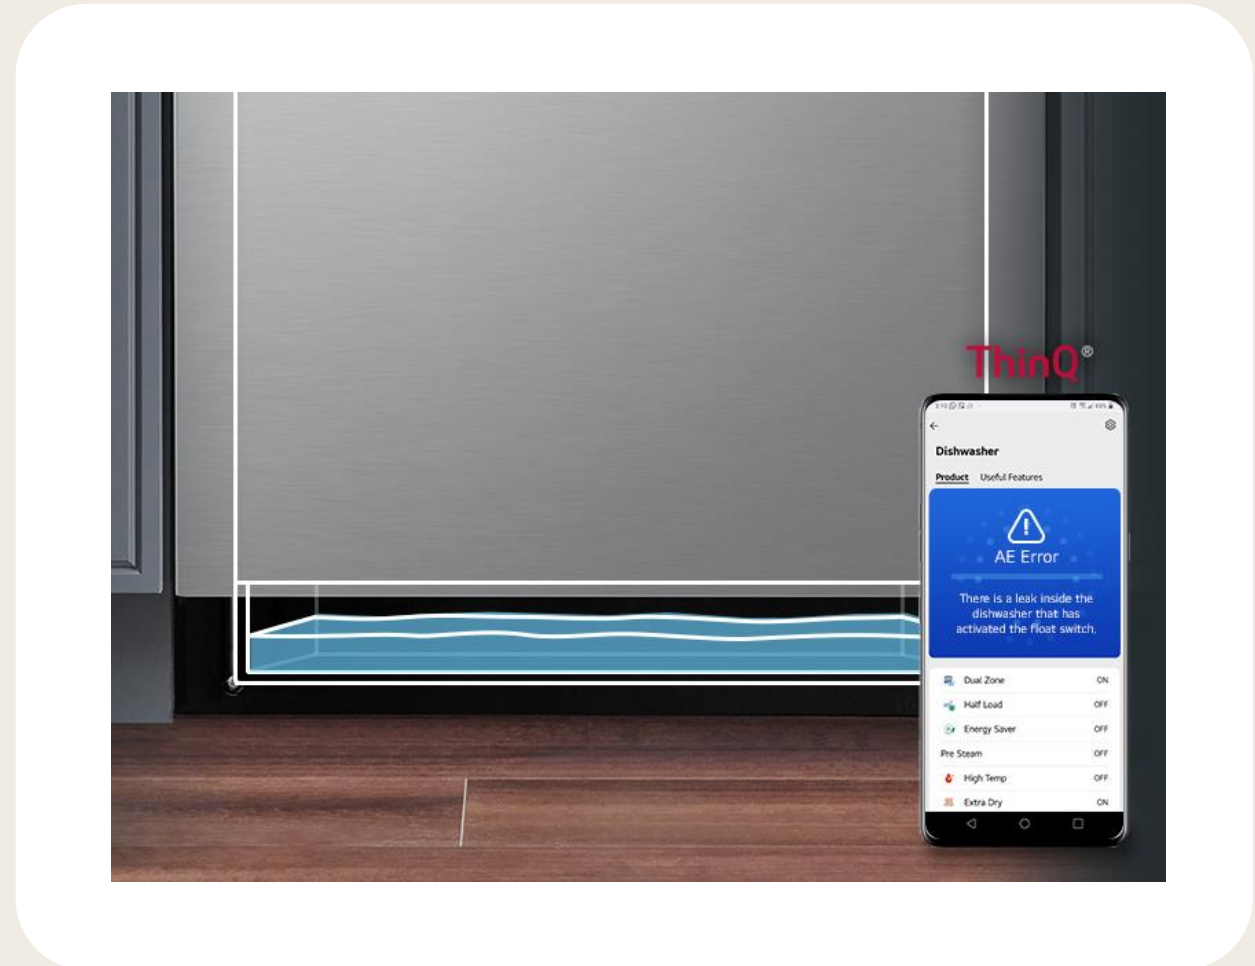

*Based on 2022 third-party testing comparing competitive consumer products

Advanced Leak Protection

Every LG dishwasher features a fully enclosed base underneath, preventing leaks from reaching your floor. With our sophisticated detection system, leaking water will trigger an automatic shutdown, ensuring ultimate peace of mind. For added convenience, models with ThinQ® wifi also provide instant notifications and detailed information allowing you to address it promptly.
