# LG Air Fry

Built-in Air Fry delivers crispy flavor fast and makes enough to feed a crowd, without the need for preheating or another gadget taking up counter space. Prepare snacks like fries, hot wings, shrimp and more for the crunch you crave without the all the oil.

No pre-heat required, just press Air Fry and the let the programmed algorithm automatically select high temperatures and a fast convection fan speed.

The oven first exceeds the set temp by 60° in order to crisp the food

The oven then goes down to the set temp, in order to cook through

Ready!

Step 1

Step 2

Step 3

## UltraHeat™ Burners

Providing some of the industries most powerful cooktops. Not only power but also precision – LG's elements/burners also maintain consistent even temperatures for the most delicate items.

**Cooktop high:** This reflects how quickly the most powerful element could raise a large pot of water from room temperature to a near boil.

**Cooktop low:** This reflects how well the lowest-powered element or burner kept a low temperature as for melting chocolate. We also set the most powerful element to its lowest setting to test its ability to hold a large pot of tomato sauce below a boil.

Noise	4 / 5

# Fastest Spin Speeds

**Up to 950RPMs**

The less time your laundry spends in the dryer, increases your **money savings!**

LG washers can extract more moisture from your fabrics – this means less time spent in the dryer.

Spending less time in the dryer means **less electricity is used, and less heat exposure to your fabrics.**

**Faster Spin = Efficiency + Savings**

## Ventless Condensation Drying

No Access to External Venting? No Problem!  
 LG's all-in-one washer/dryer allows for easy installation  
 anywhere without the need for vent set-up.

### Note

- This type of drying takes longer than conventional dryers.
- There is maximum fill line on the door opening that indicates how much fabric can be filled in order for the machine to be able to dry the load properly.

### 1<sup>st</sup> Stage

Filter out big particles thru a dual filter

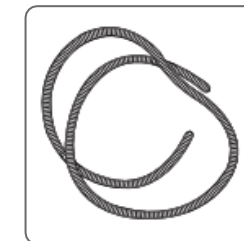

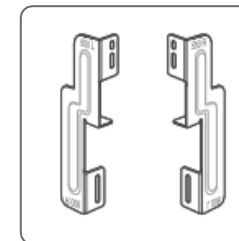

### 2<sup>nd</sup> Stage

Cleans out micro particles using a powerful water spray

**\*Stacking Kit + Drain Hose**  
 Included with Dryer

# Dual Inverter HeatPump™

Our most energy efficient ventless dryer

- LG HeatPump™ technology extracts moisture from clothes and recycles the warm, humid air so you only use about half of the energy to dry every load
- The lower temperatures are easier on clothes and can help them look their best for longer
- With no need for venting, it's easy to install and is virtually maintenance free
- The Auto Cleaning Condenser™ powerfully flushes away lint and debris every time you dry for better airflow, better drying and enhanced energy efficiency automatically
